

Replace Paper Notebooks Go Digital with an ELN

PROFESSIONAL EDITION

Your Lab Team +

Electronic Lab Notebook =

- Support research staff productivity and efficiency
- Manage lab team progress remotely to provide timely feedback and catch mistakes earlier
- Supports funding agencies Data Management Plans requirements
- Enable 24/7 real-time feedback & collaboration
- Securely protect lab's Intellectual Property
- Easy to set up. Simple to use

"The biggest benefit for me in the lab is that I can stay on top of projects remotely and asynchronously and catch mistakes without specifically being asked for input. Also, I think overall the users in the lab save a lot of time when it comes to meetings because all their data is already in electronic format."
-Dr. Carol Wilusz, Associate Professor, Colorado State University

"When I received an offer to start my own lab, I decided I wanted to start exclusively using an ELN for record keeping. I investigated several different ELN programs, and found that LabArchives was one of the more intuitive programs around and provided the type of record keeping that enabled easy sharing of data and lab notebooks, but at the same time was also secure and kept track of all revisions made."
-Dr. Richard van Rijn, Department of Medicinal Chemistry and Molecular Pharmacology, Purdue University

 Replace the Paper Notebook and Lab Manuals to better monitor, engage and evaluate your teams' lab work

 Interconnect all your lab data and image files to your observations and notes

 Easily import and access digital experimental data captured from original lab machines produced by hardware/software

 Complete audit control - tracks and stores ALL revisions, by users, for every entry - NO entry can be deleted - Protect IP

 Notebook user access can be managed to allow access rights to certain notebooks, pages and/or entries

 Create and adhere to funding agency Data Management Plans which require data sharing (via public URL or DOI)

 Lab team can easily upload images and videos directly to their notebook while conducting lab experiments

 Publish and share selected data or entire notebooks to specific individuals or the public

Visit www.labarchives.com for more information & to request a TRIAL account.

PROFESSIONAL EDITION

LabArchives® is the leading secure and intuitive web-based Electronic Lab Notebook (ELN) application enabling researchers to easily create, store, share and manage their research data. Far more than an “ELN”, LabArchives provides a flexible, extensible platform that can be easily customized to match your labs’ workflow providing benefits to Principal Investigators, lab managers & staff, grad students, library & repository staff, instructors, IT & IP departments.

Principal Investigator

- Support research staff productivity, collaboration and efficiency through a secure collaboration tool
- Effective real-time engagement with your lab personal and their work
- Securely protects lab's IP with a bank-level security and a complete record of research with a complete audit trail

Department Chair

- Complete department solution - Pro and CE provides a solution for the entire department
- Protect lab's IP with complete integration of thoughts, observations, measurements and lab results
- ELN platform meets funding agency data sharing requirements

IT Departments

- Effective solution for multiple disciplines: medicine, chemistry, biology, engineering, physics, etc.
- A hosted solution with full-time encryption with hourly back-ups to a remote server
- Works on all platforms (Windows, Mac, Linux) and includes a free mobile app for tablets/phones (iOS/Android)
- Very cost effective (department and site pricing) and provides portability with two output formats (PDF & HTML)

Librarian

- Help your research staff create and adhere to funding agency required Data Management Plans
- DOI assignment to data and support of Data Management plans via DOI permanent linking
- Campus-wide solution for research labs, lab courses and can seamlessly be used by all disciplines
- Minimal intervention required for user support

Lab Manager / Coordinator

- Track and manage the work of your lab group more effectively and remotely in real-time
- Automates data capture from instruments & permanently stores in notebook
- Document lab results and observations using photos, videos and widgets in a more engaging, dynamic and rich format
- Ability to create forms and templates as well as tools to help manage common tasks and needs within the lab
- Improves research staffs productivity enabling everyone to easily find information and recreate experiments
